

IVAN GURKOV

 [ZovutVanya](#)  [Scholar](#)  +7 (902) 964-82-88  [@ZovutVanya](#)  ivangurkoff@gmail.com  [Saint-Petersburg](#)

EDUCATION

- | | |
|---|------------------------|
|  Saint Petersburg State University
<i>ScB with honors, Cognitive Sciences</i> | 2018–2022
GPA: 4.77 |
|  Saint Petersburg State University
<i>ScM with honors, Artificial Intelligence in Speech Technologies</i> | 2022–2024
GPA: 5.00 |

COURSEWORK

Master's: Python, Linear Algebra, Calculus, Probability & Statistics, Machine Learning, Neural Networks, Mathematical Linguistics, Speech Acoustics, Automatic Speech Recognition, Text-to-Speech Synthesis

Bachelor's: Cognitive Psychology, Statistical Analysis of Experimental Data, Psycholinguistics, Cognitive Neurophysiology, Neurolinguistics

Master's Thesis: Automatic Detection and Paraphrasing of Emotion Markers in Text and Speech

TEACHING

-  **Higher School of Economics** Sep. – Dec. 2024
- Taught courses «Speech Technologies» and «Introduction to Computer Science» as a visiting lecturer at the HSE University
 - Participated in the organization of a reading club on Natural Language Processing and Deep Learning papers

- [5] P. Lyapina, I. Gurkov, D. Guseva, and M. Dolgushin, “Development of a Corpus of Interfered Russian Speech with Rhythm Labeling,” *Language, Music and Gesture: Informational Crossroads 2024*. Springer (accepted).

PROFESSIONAL DEVELOPMENT

 **Deep Learning School**

Sep. 2023 – Feb. 2024

Completed a certification from the Moscow Institute of Physics and Technology, strengthening my machine learning skills in computer vision, including classification, segmentation, and generation using PyTorch

EXPERIENCE

-  **SPBU Phonetics Lab Internship** | *Python (librosa, numpy, scipy), Bash, FFmpeg* Sep. 2023 – Feb. 2024
- Developed an intonation-center detection and labeling algorithm
 - Used FFmpeg, scipy and librosa to implement an audio/video sample synchronisation pipeline
 - Supervised data labeling of the multimodal SPBU Irony Speech Corpus
-  **Speech Drive** | *Python, Praat, pyannote, llama-cpp, PyTorch, gRPC, Docker* Mar. 2024 – now
- Developing the algorithm for automatic detection and classification of emotion in speech
 - Data labeling and aggregation of the emergency services speech corpora
 - Developed and deployed a speech diarization pipeline combining acoustic and LLM toolchains
 - Finetuning and testing our Text-to-Speech models and gRPC services

SKILLS

Languages: Russian, English

Programming Languages:  Python,  SQL,  Racket,  typst/L^AT_EX

Tools:

 +Bash/Zsh +PowerShell

 NeoVim VSCode

 FFmpeg Kaldi

 uv Google Colab

Libraries:

 Pandas NumPy SciPy Matplotlib

 PyTorch Scikit-learn HuggingFace TensorFlow (Keras)

- librosa
- NLTK
- SpaCy
- pymorphy
